The farmer's problem will be solved as soon as his crops are as diversified as the advice he gets.

The new Ford Touring has arrived at King Motors and will be on display tomorrow.

Bazaar and Dance

The First Ward Primary Bazar, Lunch and Novelty Dance will be held Saturday, Oct. 31st in the Opera House.

—2 p. m. Novelty Dance for children, admission 5 cents.

—3 p. m. Novelty Dance for juniors, 12 to 16 years, admission 25 cents.

—9 p. m. Novelty Dance for grownups, admission \$1.00. Extra lady 25 cents.

All are welcome.

Make Raymond Hum

Do your buying and your paying now—and do it in Raymond. When you pay a debt here you will see some of the money again in some form; when you make purchases here you will see some of the money again some time. When you pay a debt or make a purchase you add movement to the city's life blood and you help yourself.

As money circulation increases business is more brisk, employment increases. Let's get busy and make Raymond hum with business from now on. Do your share; don't worry about the man next to you. Maybe he is waiting to see what you will do.

School re-opens next Monday October 26th.

Public Notice

Owing to the hazards surrounding Sugar Factory, operating machinery, etc., we will not be able to permit visiting plant after the official opening, without a special pass obtained from the Superintendent. There will be no passes granted and no visiting allowed on Sundays.

We also request that children under sixteen not be brought to the Factory for the official opening ceremonies on October 23rd. Any and all visitors assume any risk of accident when entering our works, but it is particularly dangerous for children and we request that they be kept away from the Plant.

Canadian Sugar Factories Limited

T. G. Wood, Dist. Mgr.

Today Raymond and District Celebrate Opening of Factory

Today will see Raymond entertaining hundreds of visitors from all parts of the Province on the occasion of the official opening of the Sugar Factory. This is an important day in Raymond's history and marks the beginning of a new industry here. The factory is working day and night turning out the pure white sugar. This afternoon is a splendid opportunity for all to see the entire operation. All stores will be closed this afternoon.

Arranged for the Official Opening of the Raymond Sugar Factory, at Raymond, Friday October 23rd. Train will leave Lethbridge at 2:05 p. m., giving passengers time for lunch before boarding train.

This train will connect to carry passengers from Taber and points east, also passengers arriving from Calgary and points north. It will pick up passengers at Wilson and Stirling.

A special fare has been arranged of \$1.25 return from Lethbridge; 70 cents from Wilson and 35 cents from Stirling.

This train will return to Lethbridge at about 7:40 p. m. Train going west to Cardston will also be held until 7:30 p. m., so that visitors from the west will have ample time to attend the festivities.

News Notes

Buy Alberta Sugar!

Born—To Mr. and Mrs. Loif Erickson, last Sunday, a son.

The campaign at the factory began last Monday.

Henry Gibb was severely burned about the face last Monday at the factory when hot juice spouted through the door of a Kelly press. Leo Selmon, who was sitting beside him, escaped unhurt. Mr. Gibb was taken to a Lethbridge hospital.

The dance at the Sugar Co. Warehouse which was given by the two ward M. I. A's, last Thursday was well attended. The sum of \$137 was collected.

Sugar made in Raymond was placed on sale at local stores on Wednesday.

The usual brilliant success attended the dance given by the business girls on Wednesday.

Be sure to attend the dance to be given by the Board of Trade tonight in the Opera House.

The election is attracting very little interest in Raymond. Its importance is completely eclipsed by the work of harvesting beets. Next Thursday is election day. You have three choices: Stewart, Jelliff and refusing to vote for anyone. Take your pick!

The picture that is breaking all house records, "The Lost World," Played to \$2100.00 one day in Calgary. Coming to the Rex soon.

Next Wednesday Special at the Mercantile Store—Crockery at big reductions. Call in and see them. They sell themselves.

Remember that the next Wednesday special on crockery is on until 1 o'clock only. Get these bargains before that time.—Raymond Mercantile Co.

Mr. Beck, of the Lynch-Cannon Construction company, left last Wednesday for Salt Lake City. Mrs. Beck left some weeks ago.

Mrs. George Mangan (née Miss Dora Corless) of Roseburg, Oregon, arrived here on Wednesday for a visit with her mother, Mrs. Annie Corless. Miss Corless was formerly local telephone agent.

News Notes

The following program will be given on Sunday evening in the First Ward chapel at 7:30: High Lights on Book of St. Matthew by Wm. Redd, Character Sketch of Mother Mason by Miss Mary Laidlaw, Romantic Rise of a Great American by Miss May Snow, talk on Shakespear and Pinney's Life of Christ by John H. Blackmore, piano solo by Roi Stone and a male quartette. All are invited.

Miss Nina McMullin, oldest daughter of Mr. and Mrs. A. L. McMullin, was married to Mr. Lynn Bullock of Barnwell, on Oct. 11, at Welling. Miss McMullin is the grand daughter of Mr. and Mrs. Geo. C. Munns, who were among the first settlers of Raymond.

FOR SALE—Seven room residence, acre lot and garage. Located on Broadway, close in. Small cash payment will handle. Apply at Recorder office.

RED ROSE TEA "is good tea"

And most grocers recommend it.

The West Leads the Way

Despite the fact that from press and platform in Eastern Canada sharp criticism, even abuse and misrepresentation, of Western men, organizations and policies continues to be voiced, and the West generally held up before the public gaze as utterly selfish, concerned solely with its own interests and regardless of the welfare of other portions of the Dominion and quite indifferent to the fate of Confederation itself, there is nevertheless discernible a clearer, more sensible view of the West by Eastern men and institutions who take the trouble to study the actual situation and get below the clouds of propaganda.

With such men there is a growing conviction that here in the West the people are seriously and successfully grappling with one of the greatest of all great Canadian problems today, namely, economy in public administration and consequent reduction in taxation. At the same time, while insistent upon their rights and urging the necessity for reforms and the adoption of certain policies, the people of the West are not withholding but are hard at work seeking their own salvation and the permanent welfare and prosperity of Canada as a whole.

An illustration of this very welcome development is found in the concrete facts laid before the Investment Bankers' Association of Canada at their annual meeting in Montreal recently. The Association was informed that in the matter of municipal borrowings and expenditures Western Canada is setting an example which the East would do well to follow. In each year since 1920, Western municipal borrowings have declined, with the result that in the three years of 1922, 1923 and 1924 the total amount borrowed was ten million dollars less than in the one year of 1913.

On the other hand, Eastern municipalities borrowed sixteen million dollars more in 1924 than they did in 1913, while the aggregate of their borrowings in the last three years was \$200,000,000, or nearly three and one-half times the figure for 1913, compared with a decrease of ten million dollars in the West.

But this is not all. Returns for 1923 show that while six out of seven of the large cities in the four Western provinces reduced their per capita expenditures, seven out of seven of the large cities in Ontario and Quebec increased their per capita expenditures.

Turning from the question of municipal to provincial finance, this convention was informed that in 1921 three of the four Western Provinces had balanced budgets and showed surpluses, while in the East only Quebec showed a surplus, and Ontario's deficit was over eight million dollars.

Commenting on these figures and developments, the report to the Investment Bankers' Association in regard to the municipalities says: "The facts are significant. Such results in Western Canada, whether born of prudence or necessity, are setting an example which might well be followed in larger measure by many of our older and larger urban communities in Eastern Canada. And, dealing with Provincial finances, the report says: "That three of the four Western Provinces have succeeded in effecting this result (balanced budgets and surpluses) is evidence of a sound fiscal policy, which if continued and followed up by businesslike methods of debt amortization, must inevitably be recognized as a sound way by underwriters and large business institutions both at home and abroad."

Throughout the length and breadth of Canada there appears to be agreement that economy in public administration and reduction in taxation are imperative and essential to the welfare of the Dominion, and that until this is brought about, and definite action taken towards the liquidation of our heavy war debt, Canada cannot prosper as it should. If this is true, and no one is bold enough to question it, then the evidence shows that, despite all Eastern criticisms, it is the West that is making a real contribution to the stability of Confederation, and doing so by self-denial and hard work, while Eastern Provinces and municipalities go on piling up still larger debts, thereby further increasing taxation.

Under Providence, the West has this year added enormously to the wealth of Canada. As the result of the labors of our people the wheels of industry are being speeded up all over the Dominion, business is steadily improving, and, with railways busy, their net earnings are showing substantial increases. Present indications are that the Canadian National with this year make the best showing in its history.

If the propagandists of the East, instead of sneering at the West as self-centered, narrow and selfish, and accusing Western people with being secessionists or annexationists, would impartially study the facts, and then co-operate with the West for the good of all, Canada would soon be on the high road of prosperity.

Million Dollar Oil Co.

The famous Dutch Shell Oil Company, with activities all over the world and in which the British Government is a heavy shareholder, has decided to enter the Canadian field. This word came from Ottawa in the latest issue of the Canada Gazette, announcing the incorporation of a million dollar Canadian Shell Oil Development Company.

The only difference between meddling and investigating is that we always investigate and the other fellow meddles.

The Muddle in Europe

The only spirit of tolerance is displayed by the British statesmen. Germany and France face each other in a spirit of mutual defiance and distrust. France is determined that Germany shall not get what France wants. The attempt of the British Government to act the part of the umpire in the dispute has raised her representatives to be suspected by both.—Los Angeles Times.

Don't be slovenly in your dress. Ties apply to women only, as men are not supposed to wear dresses.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* Proven directions on each package. Physicians everywhere recommend it.

A Strange Discovery

Parts of Whale Backbone Found in Okanagan Lake

Portions of the skeleton of a denton of Okanagan Lake, in the southern interior of British Columbia, in which residents of the districts have at various times asserted they have seen creatures usually classified as sea serpents, were delivered to the provincial government museum at Victoria, B.C. After a conference of biological experts, the remains were pronounced to be parts of the backbone of a whale.

"DIAMOND DYE" ANY

GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple, any woman can tint that soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything! Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

A Long Wearing Suit

J. R. Will, a former near Westerner, Md., is believed to have the longest wearing suit of clothes. He bought the suit 23 years ago. He wore it into the store where it was purchased a few days ago and the merchant gave him a new coat and vest for the old one.

WOMEN'S HANDICAPS

Headaches and Backaches Often Make Life Miserable

A woman's health handicaps her almost always. She has pains and disabilities which do not afflict men. Nature does not give her a fair chance. Her blood is more often thin and poor than a man's and she often neglects the first beginnings of ill-health. Many of frequent suffering have been freed entirely from their suffering through the wonderful blood-making qualities of Dr. Williams' Pink Pills. Many a woman tells all day with a pain in her back and side, a burning headache, and a sense of having no spine left.

What a pity women will not listen to their friends when Dr. Williams' Pink Pills have saved from their misery. Whenever a woman suffers they will help her—in youth, middle-age and after-life. Mrs. John Mitchell, of Middleville, Ont., gives her experience for the benefit of other women sufferers. She says: "Some years ago I was so badly run down I could hardly walk around the house. I tried to do a few chores but was able to do very little. My boys and husband had to do the rest. If I started upstairs I had to go very slow or I would fall, and I was just dyed out when I got to the top of the stairs. My head ached terribly, and my heart would beat violently. In this deplorable condition I began taking Dr. Williams' Pink Pills. When I had finished six boxes I felt much better. Then I got a further supply, and by the time I had taken these I could walk anywhere without being exhausted, the headaches had disappeared and I am now perfectly well. Any woman who is run down should not hesitate to begin Dr. Williams' Pink Pills at once, as I am sure from my own experience they will build her up."

You can get these Pills from any medicine dealer or by mail at 50 cts. a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

British Justice

One Equal Law For the Rich and Poor Alike

One of the great traditions of the British people is the impartiality of British justice. British justice is swift, sure, inexorable, but above all we like to think of it as impartial. At times it has been unduly harsh, as when men were hanged for stealing a sheep, a felter or a horse, or for highway robbery. But, on the whole, it has been impartial—one equal law for rich and poor alike—law above the power of money or social or political prestige to bribe or purchase or sway or modify in its application.—Catholic Register.

Minard's Liniment for Sore Back

SUNDAY SCHOOL LESSON

OCTOBER 18

PAUL WRITES TO THE CORINTHIANS

Golden Text: Now abideth faith, hope, love, these three; and the greatest of these is love. 1. Corinthians 13:13.

Lesson: 1. Corinthians 12:1 to 13:12. Devotional Reading: 1. John 4:7-13.

The Text Explained and Illumined

The Essentialness of Love, verses 1-3.—Emotional gifts are valuable without love. Eloquence unimpaired by love means no more than so much noise, declares Paul in his words, "If I speak with the tongues of men and of angels, but have not love, I am become sounding brass, or a clanging cymbal." Paul's love for his readers leads him to speak of the possibility of his being without love rather than to accuse them of this lack—thus he illustrates the lesson he wishes to teach. The Greek word translated "tongues" means primarily "ecstatic utterances." "The gift of tongues was an ecstasy of feeling by which men were carried away and broke into rapturous, inarticulate utterances. A modern musician has written songs without words; this is a very apt description of the peculiar kind of spiritual emotion called in the New Testament 'speaking of tongues.' Probably the nearest approach to it most Christians make is when they are carried away by the feeling of a revival meeting. In Mr. Moody's revival meetings the church was full of men who floated, so to speak, on a wave of emotion; an unutterable joy in the redeeming love of God seemed to sustain their life; it was full, as they would have said in the early days, of people speaking with tongues" (James Denney).

Growth Of Fox Farming

Over Ten Million Dollars Invested in Industry in Canada

At the end of 1921 there were 1,466 fox farms in Canada and the value of the property was \$10,813,332, according to statistics. The relative position of each province with respect to the total value of fox farms was as follows: Prince Edward Island, 37 per cent.; Ontario, 16 per cent.; Quebec, 12 per cent.; New Brunswick, 9 per cent.; Manitoba, 8 per cent.; Alberta, 6 per cent.; Nova Scotia, 6 per cent.; British Columbia, 3 per cent.; Saskatchewan, 2 per cent.; and the Yukon Territory, 1 per cent.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mother who suffers from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

"So you and your wife eloped?" "Yes, but I have since had reason to believe that her father bought the ladder I used and placed it just where I couldn't help seeing it."

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

The two stood on the darkened porch after the dance. She waited. "Love is blind," he quoted rapturously. "Well, can't you tell where I am by feeling?" she asked peevishly.

Herr Saxe, who invented the Saxophone, was fortunate enough to pass away before the instrument came into general use.

FOR DIARRHOEA DYSENTERY AND ALL SUMMER COMPLAINTS

Gives Instantaneous Relief

It has been a household remedy for over 80 years. You can always rely on it in time of need. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Take Vacation In Aeroplane

Yearly Habit of London Couple Makes Unique Holiday

Captain Frank Courtney, who tests aeroplanes for a living, and his wife have started a vacation which will be spent in the air, sightseeing in various parts of Europe.

Mrs. Courtney has had some experience as an aviator and can operate a plane, once it is in the air, nearly as well as her husband; but the take-offs and the landings bother her, so on tour Courtney always attends to these while she relieves him at the control.

The Courtneys are pioneers in roaming about Europe in a plane as a holiday stunt. Their machine is fully equipped with everything that might be required for making minor repairs, as well as with cooking utensils and blankets for sleeping out. They sleep on the ground, but take most of their meals in the air. The couple started from London, crossed France and then visited Spain and Italy. Now they will fly any direction their fancy dictates, gradually making their way homeward across Europe.

Courtney has taken thousands of aeroplanes up for their first flights, and says he can always tell while skimming across the grass whether a machine is airworthy.

Sour Stomach Risings Quickly Relieved

The wonderful comfort and relief you get from even twenty drops of Nerviline will surprise you. Take it in sweetened water; it's not unpleasant. Almost immediately you feel better. Nerviline brings up the gas caused by fermenting food, and at the same time relieves that distressed feeling in the stomach. When colic or cramps strike you at night, when nausea or upset stomach overcome you, then it is that you'll find Nerviline a sure relief. For general use in the family, for emergent ills, always keep Nerviline handy on the shelf. Get a 25c. bottle to-day.

Conditions In West Good

Stating that he believed Western Canada is in a better shape as a whole than is generally realized, George Stephen, assistant freight traffic manager of the Canadian Pacific Railway, commented on his observations made during a five weeks' tour of the western provinces. He expressed the opinion that business conditions in the western provinces and British Columbia have improved, since he said that the mines in the Crow's Nest district have been working to capacity all season.—Free Press.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Scientists Working In Transvaal

Have Located Ancient Road 200 Miles In Length

Large lime deposits in Northern Transvaal have been found to be fossil bearing, and scientists are preparing to make an extensive search. Moreover, in the Transvaal, ancient mine workings have been located. The latter are believed to have been worked by pigmies who used copper chisels. A further interesting discovery has been made, likewise in the Transvaal, of an ancient road, 200 miles in length, running through the Woodbush country.

For years Mother Graves' Worm Extremulator has ranked as a reliable worm preparation and it always maintains its reputation.

Soviets and Poles Friendly

Russia Anxious to Have Goodwill of Nearest Large Neighbor

In view of the prospect that Germany will negotiate a security pact with the allies and enter the League of Nations, Soviet Russia's relations with Poland, which in the past have been marked by lack of cordiality, and even acrimony, have lately assumed a strikingly friendly character.

This has been forcibly emphasized by the warmth of the reception accorded M. Tshitcherlin, Russian foreign minister, at Warsaw. The Soviet press interprets his Warsaw reception as the beginning of a definite rapprochement between Poland and Russia.

Russian official circles profess to see in the proposed security pact a move on the part of the Western European powers to create a united front of all Europe against the Soviet union, and they appear anxious to have at least the friendship and goodwill of Russia's nearest large neighbor, Poland, to offset the bloc.

Men are usually embarrassed when they propose—either financially or otherwise.

Minard's Liniment for Colds

Wheat Pool Grows

105,000 Members in the Three Western Provinces

Alberta's wheat pool has registered material growth since the first of August; the increase in membership in this period being 676, bringing the total membership to 32,130, an increase of 2,014 in the year. The Canadian wheat pool, comprised of farmers in the three prairie provinces, now has more than 105,000 members, an increase of 13,400 in the last six weeks.

Few physicians are equal to the task of curing patients who have nothing the matter with them.

Predicts No Summer Is 1926

The years 1926-27 will be without summers and the world's grain supply will be menaced, declares Norbert Jauvrit, a French meteorologist, of Washington. His theory is based on the lunar cycle.

The Touring Automobile As A Means Of Unifying The Far-Flung Sections of Canada

How much is tourist development really worth to Canada?

There are two ways of looking at that question. The usual way is to view it through financial glasses. One needs only to glance at the figures cited by various authorities to realize that the money now spent in Canada every year by tourists from abroad has become one of the major items of our national income.

But there is another and perhaps equally important side of the question. Tourist development means a great deal more than the coming of an army of free-spending visitors. There is also the enormous increase in the actual travelling done within the Dominion by the Canadian people themselves. The value of this feature is not to be measured in dollars and cents, but it bids fair to exert a priceless influence upon Canadian unity.

It has long been a byword that Canada is a "difficult country to govern." The territory of the Dominion is not only far flung, but it is naturally broken into sections which differ as radically from each other in economic opportunities as in physical character and location. How to unify these sections, how to get some real sympathy of outlook and mutual appreciation of their respective problems, has been the great task of Canadian citizenship and statesmanship. And the increased travel of the Canadian people looks up as one of the most effective instruments for that purpose.

Canadians today are almost uniquely equipped to see their country. It is an actual fact, according to the natural resources intelligence service of the department of interior, which is paying particular attention to the tourist traffic in Canada, that the nine or ten million people of Canada own more passenger autos than any other nation on the face of the globe except the United States. They own more passenger cars than the 47,000,000 people of Great Britain or the 40,600,000 of France. The people of Ontario alone possess as many cars as the combined population of nearly 80,000,000 living in Germany, Holland, Denmark, Norway and Sweden. The cars owned by the whole of the Danish people are just half the number of those owned by the people of Saskatchewan.

It will be a remarkable fact if, in a few years' time the touring of Canadians within the boundaries of the Dominion does not succeed in sweeping away a great deal of the divergence of outlook as between various parts of the Dominion, which in past years was the natural outcome of lack of acquaintance.

Looking After Reforestation

Britain Finds Time to Devote to Important Work

The forestry department began the work five years ago and has already set out 52,000 acres in trees. This season's work will cover 22,000 acres and bring the whole number of trees planted to two hundred million. The British Government is now faced with problems. Scarcely has there been a time when it has had more serious ones on hand. Yet it finds time and strength to devote to what is after all of more importance to British prosperity than some of the noisily exploited issues of the present day, the setting out of millions of saplings to prevent the land from becoming treeless and desolate. Providence Journal

The Success Family

The father of Success is Work.
The mother of Success is Ambition.
The oldest son is Common Sense.
Some of the other boys are: Perseverance, Honesty, Thoroughness, Foresight, Enthusiasm, Co-operation.
The oldest daughter is Character.
Some of the sisters are: Cheerfulness, Loyalty, Courtesy, Care, Economy, Sincerity, Harmony.
The baby is Opportunity.
Get acquainted with the "old man" and you will be able to get along pretty well with the rest of the family.

Tar Sand Paving

Alberta tar sand paving is at present being laid down on the trucking surface in front of the Canadian National freight sheds in Saskatoon. The spot was chosen as being suitable for offering conclusive evidence one way or the other as to the value of the Alberta product.

Some men are in the best of spirits only when the best of spirits are in them.

The more explaining a man has to do, the less humanity believes in him.

W. N. C. 1298

Marketing Eggs Co-operatively

Assistance to Farmer in Securing a Better Price

Eggs demand the most efficient and rapid handling methods that can be devised and for a number of years strenuous efforts have been made in the direction of improved methods with satisfactory results. The Federal and Provincial Governments are encouraging co-operative marketing as a solution of the problem. National standards have been devised by which eggs may be graded and standardized and the co-operative egg circles have proved of great assistance in this work and in improving packing methods.

A bulletin issued by the Dominion livestock branch gives detailed information as to how to organize one of these egg circles and how to finance it and carry on its business. Farmers joining these circles soon see the advantage of keeping good laying strains of hens on account of the better prices obtained for the higher grades of eggs and of the increased production. By cutting down expenses and by catering to the requirements of better markets the egg circles assist the farmer in getting a considerably higher price for his products than he would by doing his own marketing. The egg circles may also link themselves up into large co-operative marketing associations which act as an "egg pool" and stabilize prices by operating storage facilities. The bulletin, which is distributed by the Publications Branch, Department of Agriculture, Ottawa, gives detailed information on the marketing of eggs and poultry.

Would Dispel Superstition

To Curb Powers of Magician Over Lower Classes in Turkey

To combat the power of the "magician" over the lower classes of the people and their belief in the "evil eye," numerous Turkish doctors are to be sent into the interior of the country where medical science is unknown.

In the small villages they will endeavor to dissipate the superstition of the illiterate Turks who believe that the only preventive for disease is the wearing of a blue bead, which nullifies the baneful influence of the "evil eye."

The decision to send the doctors on this mission was decided upon at the first medical congress ever held in Turkey, called by President Mustafa Kemal Pasha to discuss medical problems of the country. Five hundred and sixty-six doctors attended the meetings.

Experiment Is Success

Partridges Imported to Manitoba From Hungary Are Increasing

The Hungarian partridges imported to Canada and released in the Neopawa district by the Brandon game protective branch, are rapidly increasing. This fact was ascertained by B. J. Hales and R. M. Matheson, K.C., who have just completed a tour of inspection in the district.

Thirty-eight partridges in all were first released for experimental purposes. They withstood the rigor of winter weather here in splendid fashion and none was reported to have died. One covey has been sighted about five miles away from where they were hatched, which would indicate that the birds were widening the radius of their flight.

Marketing This Year's Grain

Figures Give Idea of How Big Wheat Crop Really Is

If all the wheat marketed during September along the Canadian Pacific Railway were baked into bread and loaded on standard delivery wagons, each wagon containing 1,000 loaves and travelling at the rate of five miles an hour, it would take eight and a half weeks for these wagons to pass a given point. This is the statement given out at Whinlpeg by the statistician of the transportation department of the railway.

The marketing of grain on the C.P.R. in September amounted to 62,694,957 bushels. In 25 nine-hour days this is at the rate of 75 bushels per second.

Says Oyster Becoming Extinct

That the oyster is "going the same way as the buffalo and the elk," and within 10 years will be "an expensive luxury," is the opinion of W. F. Downs, secretary of the Atlantic Fisheries Association. From 1912 to 1922, he said, the number of oysters taken from United States waters decreased from 25,000,000 to 17,000,000.

Would Supply Britain With Canadian Meat

Vancouver Man Submits Perfected Plans to British Government

Canada will become the chief source of the meat supply of Great Britain, and Western Canada generally will benefit largely if the proposal of Major E. G. Palmer, Vancouver, which has aroused the interest of the British Government and the agricultural committee of Ontario, are carried out. Major Palmer's scheme is the shipment of chilled meats from both coasts of Canada to the Old Country. The scheme, which is Dominion-wide in its scope, contemplates not only the establishment of a chain of necessary places in Eastern and Western Canada, but the organization of centres in Great Britain, Vancouver and Montreal, and one of the winter ports of the eastern coast.

Major Palmer is president of a Vancouver coal company, but has had years of experience in the meat packing and shipping industry. He was at one time manager of the Pastoral Finance Association, one of the largest exporting organizations in Australia doing a volume of trade with Great Britain that ran into hundreds of thousands of pounds yearly.

During the South African war he was in charge of maintaining the meat supplies for the army and civilian population of the Natal and Transvaal. After coming to Canada he headed a commission for Alberta to consider the supply of the British market with fresh meats, and it was following this that he perfected plans that he has now laid before the British Government, through Prime Minister Baldwin.

Korean Nobles Are Poor

Once Wealthy But Now Forced to Perform Menial Tasks

The Korean nobility, with the exception of a few privileged peers, is reported to be suffering from extreme poverty. Several of the nobles, who were once wealthy, are now working as cart-pullers and performing other menial tasks as the only means of escaping starvation.

At the time of the annexation of Korea by Japan, about 60 of the leading Koreans were created peers and given property by the Japanese Government. Most of them ran through this property rapidly. Recently 30 of the impoverished Korean nobles sent a petition to the Japanese Government asking for financial assistance.

Guests who plan dangerous mountain climbs are requested to pay their bills in advance by one Alpine hotel.

Nurse Crop For Sweet Clover

Tests Show Winter Killing Less Likely To Occur

Tests at the Brandon experimental farm emphasize the fact that sweet clover is much more economically produced when sown with a nurse crop than when sown alone. The yields of the various nurse crops are in no way reduced due to the presence of the sweet clover and the slightly increased yield the following season in favor of seeding alone is insignificant. The stubble also affords considerable protection and hence winter killing is less likely to occur.

Man was made to mourn, but a widower usually outlives it.

Develops New Potato

Tuber Originated at Raymond, Alberta, Is of Superior Quality

"Early Queen" is the name given to a new potato originated by H. H. Kimball, truck gardener of Raymond, Alta. The tuber is of the white variety, combining earliness, fine flavor, cooks well and is of an excellent keeping quality.

Three years ago Mr. Kimball imported sufficient registered stock of Woe MacGregor potatoes to seed three acres. To maintain purity of strain, the grower made application for government inspection. The professional man suggested that a number of hills of "mongrel stock" be uprooted. A stake was driven in the hills designated for destruction. When Mr. Kimball started to dig up the spuds, he was surprised to note that the earth surrounding the vines was forced up until the tubers were showing and all indications pointed to a heavy yield. They were left until harvest, when the clean, white appearance so attracted the gardener that a test on a larger plot was made the following year. Not until mid-season was the extreme earliness of the "mongrel" discovered.

This year the white potatoes were planted side by side with the "Early King," a pink variety, known for its early ripening. The white potato beat the old favorite by 18 days. This new variety is now fetching \$5 a hundred pounds for next year's seedling.

The Wheat Pool

Success of the Pool in Its First Year of Operation Is Most Gratifying

The wheat pool has made a final payment which makes the basis of payment \$1.66 a bushel, after deducting carrying charges in both country and terminal elevators. Three-quarters of a million dollars has been set aside as a reserve and 85 elevators have been bought or built. The actual cost of operation for the year amounted to only a fraction over half a cent per bushel.

The triumphant success of the wheat pool in its first year is most gratifying not only to the farmers of Western Canada, but to the business men and the financial institutions of Eastern as well as Western Canada. Any economy in the handling of our main cash crop is a gain for the country as a whole, for the wheat crop of the west speeds up or slows down the wheels of industry in the east. Saskatchewan Herald.

Nursing Standards Are High

Comparing the activities of the last congress of the International Council of Nurses held in 1912 in Cologne, Germany, with those of the congress held this year in Finland, one notices a great advance in nursing education since the pre-war days. Miss M. E. Hersey, superintendent of nurses at the Royal Victoria Hospital, Montreal, on her return from the conference in Finland.

Canadian Bond Sales

Canadian bond sales since the beginning of the current year up to September 5, totalled \$321,005,525, as compared with \$508,661,267 in the corresponding period of 1921 and with \$432,620,623 in 1923. So far this year of the total Canadian bond sales, \$157,745,000 have been placed in the United States; \$105,282,155 in Canada and \$27,978,333 in Great Britain.

Hunting Big Game in the Kootenays

The picture was taken at Nelson, British Columbia, in the heart of the Kootenay district. The deer there are plentiful and the sportsmen who go there always come away, if not laden as above, at least with a goodly supply of trophies to show and stirring stories to tell their friends.

The fall, of course, is the big open season. Then it is that the outdoor-loving Canadian takes down his good old blunderbuss, looks it over carefully, digs out the old mackinaw and caribou and the long boots, rushes for his game license and hits the trail for the fall timber as fast as his legs or his auto, or a Canadian Pacific train will carry him. Farther south, his American cousin goes through the same performance and also heads for the Canadian wild. And from England and Europe more ardent devotees of Nimrod and transient sportsmen passing through the Kootenays on their way home from the Orient go forth in quest of that record bag of deer around Nelson or the great big grizzly, mountain sheep or goat in the record.

Oh, yes, Canada is a sportsman's country.

League Of Nations Might Profitably Study Relationship Between Canada And U. S.

Seed Registration

In Western Provinces

Inspection Just Finished Shows Large Increase in Barley

A decrease in total acreage of registered seed inspected in the western provinces is counter-balanced this year by a considerable improvement in yield, according to the final returns from 14 inspectors who have completed the Canadian Seed Growers' Association field work for this year, working under the seed branch of the Dominion department of agriculture.

Inspections were made at 240 points of 739 fields owned by 387 farmers, and comprising 17,000 acres. The acreage is about 5 per cent. under that inspected last year, but the total number of bushels is greater by 50,000.

A feature of the work this year, states J. E. Blakeman, chief inspector for the Dominion seed branch, is the large increase in registered barley. There is no grain where purity as to variety is more important, since the matting value of barley depends greatly on this feature. The varieties grown most largely were Hannchen, in Saskatchewan, which had four times its last year's acreage, and O. A. C. 21, which was sown on an average ten times greater than in 1921. There is a slight increase in Marquis wheat, also in Banner oats, Kota and Mindum are not on the registered list, but several inspections were made of these wheats, and Mindum may shortly be added to the eligible list.

Butter and Cheese Output

Growth of Dairy Industry in Canada Is Shown by Returns

The manufacture of creamy butter in Canada in 1924 showed an increase over 1923 in every province excepting Prince Edward Island and New Brunswick, in Nova Scotia by 588,863 lbs., in Quebec by 6,381,860 lbs., in Ontario by 5,181,401 lbs., in Manitoba by 1,902,814 lbs., in Saskatchewan by 2,626,663 lbs. In Alberta by 1,420,035 lbs., and in British Columbia by 710,206 lbs. 1924 was a record year in Canada for the manufacture of dairy butter, being 184,290,922 lbs. over 21,000,000 lbs. in excess of the turnover in 1923. In the produce of factory cheese there was an increase in 1924 compared with 1923 of 234,409 lbs. in Prince Edward Island, of 116,811 lbs. in New Brunswick, of 4,662,823 lbs. in Ontario, of 364,257 lbs. in Manitoba, in Saskatchewan of 20,711 lbs. and in British Columbia of 27,453 lbs. Nova Scotia was practically stationary, but there was a decrease in Quebec and Alberta, both of which showed a good increase over the output in 1922.

Retain Name Of Marquis Wheat

Not Sufficient Difference to Warrant Introduction of New Names

A decision against giving new names to the various strains of Marquis wheat eligible for registration under the rules of the Canadian Seed Growers' Association was reached at a meeting of the Saskatchewan provincial seed board.

The board discussed a resolution recently adopted by the executive of the Canadian Seed Growers' Association in consultation with L. H. Newman, Dominion cerealist, and came to the conclusion that there was not sufficient difference between the strains of Marquis wheat to warrant the introduction of new names, which would only be confusing to growers. They favor the retention of the numbers used at present to designate the various strains.

An analytical study of the various strains of Marquis wheat was presented to the provincial board meeting by E. G. Booth, of the provincial field crops branch.

We Sing It All Right

A Toronto bandsman is quoted as saying that "O Canada" is not a national anthem, and is not up to the highest standard as a musical composition. Possibly he is right; but if it is not already a national anthem, it has a strong hold on popular favor. If it is not up to the highest standard as a musical composition, that would be nothing to worry about. A national anthem should appeal to the masses, and that is something which a musical composition of the highest standard might fail to do.—Chatham News.

Hotel On Crusoe's Island

Little hardship will be in store for anyone in the future who is shipwrecked on the Robinson Crusoe Island of Juan Fernandez. The Government of Chile proposes to erect a hotel on the "isle of romance" to accommodate the large number of tourists.

The governments represented in the League of Nations are reported from Geneva to be studying the recent extradition treaty between Canada and the United States, covering offenders against the laws concerning opium and other dangerous drugs, with a view to the conclusion of similar treaties among them. A recommendation to this effect recently was approved by the league council on recommendation of its permanent opium council.

The wisdom of good example not always is lost, nor often, let it be hoped; eventually good example must invite to compensatory emulation among nations, as among individuals.

The council and the league profitably might go further in studying the relationship existing between the United States and Canada. Their comradely association illustrates a remarkable situation in international relations, and this situation has endured for more than a century; there appears to be no reason to doubt that it will continue to endure for centuries to come.

Canada and the United States have demonstrated to the world the wisdom of justice, confidence, reason and faith as applied to international association. The result is that each nation is developing as no other nation ever developed in the past. Canada and the United States are engaged in a supreme international partnership—a partnership in which are incorporated higher and more important values than material interests. In any grave crisis menacing the interests of either, it is rather certain that the other would be found ready to meet the issue by spontaneous and unstinted support.

Just the other day, in majestic Stanley Park, Vancouver, was dedicated a stately and impressive monument by Kiwanis International, through subscriptions of its members in Canada and the United States. In a cleared space under mighty forest trees stands this International Good-Will memorial. It represents Canada and the United States facing all the future, hand in hand. It is the only symbol of fortification, outside of mile posts, to outline the geographical demarcation of thousands of miles of border line separating the two countries from the Atlantic to the Pacific.

Let the League of Nations and its council ponder this spectacle that so gloriously exemplifies the feasibility of international fraternity and peace!—Cincinnati Enquirer.

The Best Pay Best

Good Quality of Cattle Always in Demand When Marketing

An ancient story is told in the last monthly review of livestock conditions by the market intelligence division of the livestock branch at Ottawa, but it is a story that cannot too strongly be impressed upon the breeders and sellers. Good quality cattle, the review says, were always in demand and enjoyed a good outlet at fairly strong prices, but medium and common grades, which made up a large percentage of the offerings, were rather hard to sell and at most markets closed at lower prices. Good quality feeders were in demand but other sorts were slow in sale. A similar story is told of all classes of livestock. Select bacon hogs ran in price three to four dollars over what they brought in the month of August last year. They also showed an increase in numbers in Montreal and the west.

Slightly Mistaken

It Was Just Another Sample Case of Mistaken Identity

How the identity of the immortal living may be confused with that of the immortal dead is illustrated in the case of the verger in Westminster Abbey, who was escorting a party of North England visitors through its historic aisles, and pointing out the resting places of Britain's famous men. "Here," he explained, as he passed before the memorial to the great essayist, "is the tomb of Addison!" The customary interval of impressive silence was broken by a husky northern accent from the rear of the crowd. "Ay, lass; that's the mon as avanted the grannym/phone."

Easy

Lloyd (after a momentary silence)—"Do you suppose that you will ever tire of me?"

Della—"I can't think of any reason why I shouldn't."

Recluse for longevity: The elephant, parrot, crocodile and turtle live long. They don't strain themselves to make it snappy.

After illness you need BOVRIL

FREE GOVERNMENT INFORMATION Increase Poultry Profits by Marketing Co-operatively

THE Western Wheat Producers, the Ontario honey men and others, have made co-operative selling a marked success. They have stabilized prices and increased their profits by standardized grading and shipping methods; and applying efficient salesmanship and real merchandising to the disposal of their crops. By these methods the poultry producers, too, can secure these benefits.

Naturally, to be successful, co-operative marketing must be handled efficiently. How to form and operate successfully a local organization is detailed in the FREE booklet, "Co-operation in Marketing Poultry Products," issued by the Department of Agriculture at Ottawa. This is one of over five hundred helpful pamphlets on farm subjects. To obtain it, together with complete list of FREE pamphlets, fill in this slip, and return it post free to:

BARRE, SON OF KAZAN by James Oliver Curwood A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. Is an Adaptation of This Story

SYNOPSIS

Pierrot, the trapper, received word that McTaggart, the factor, would arrive at Pierrot's cabin the next day to demand the hand of his daughter, Nepeese. "He is a beast—a little devil," Pierrot warned Nepeese. Barre, the wolf-dog, hunting near McTaggart's camp, was caught in one of the game snares laid by the factor. McTaggart, finding him lying trussed up like an Indian papoose, cried, "You little devil! I ought to beat your brains out—and I believe I will!"

CHAPTER XII.—Continued.

The stick fell. It fell again and again, and when McTaggart was done, Barre lay half stunned, his eyes partly closed by the blows, and his mouth bleeding.

"That's the way to take the devil out of a wild dog," snarled McTaggart. "I guess you won't try the biting game again, eh, youngster? A thousand devils—but you went almost to the bone of this hand!"

He began washing the wound again. Barre's teeth had sunk deep, and there was a troubled look in the factor's face. It was July—a bad month for bites. From his kit he got a small flask of whiskey and turned a curl of the raw liquor on the wound, cursing

PAINS ACROSS THE BACK

Relieved by Lydia E. Pinkham's Vegetable Compound

Mitchell, Ontario.—"I have taken your medicine for a number of years. I do not take it steady all the time, but I am never without it. I always keep it in the house. I took it first for pains in the abdomen and bearing-down pains, headaches and pains across the back. I have my home to look after and many a day I could not get up at all. I saw the advertisement in the paper about Lydia E. Pinkham's Vegetable Compound, and Mrs. John Miller told me about it, too. Every time I take it, it makes me feel better and I always recommend it to my friends. I am willing to answer letters from women asking about this medicine and you may use this letter as a testimonial."—Mrs. F. J. WASSMANN, Mitchell, Ontario.

The merit of Lydia E. Pinkham's Vegetable Compound is told by women to each other. Many women know by experience what this medicine will do and they are anxious for others to know. Such testimony should cause any woman suffering from the troubles so common to her sex to give this well-known medicine a fair trial.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial.

W. N. U. 1598

cabin. With a cold, gray face Pierrot faced Bush McTaggart.

CHAPTER XIII.

From the window, her face screened by the folds of the curtain which she had made for it, the Willow saw what happened outside. She was not smiling now. She was breathing quickly, and her body was tense. Bush McTaggart paused not a dozen feet from the window and shook hands with Pierrot, her father. She heard McTaggart's coarse voice, his boisterous greeting, and then she saw him showing Pierrot what he carried under his arm. There came to her distinctly his explanation of how he had caught his captive in a rabbit-snare. He unwrapped the blanket. Nepeese gave a cry of amazement. In an instant she was out beside them. She did not look at McTaggart's red face, blazing in its joy and exultation.

"It is Barre!" she cried. She took the bundle from McTaggart and turned to Pierrot. "Tell him that Barre belongs to me," she said.

On the floor of the cabin Nepeese dropped on her knees and finished unwrapping the blanket. She was not afraid of Barre. And then, as Barre rolled in a lump heap on the floor, she saw his half-closed eyes and the dry blood on his jaws, and the light left her face as swiftly as the sun is shadowed by a cloud.

"With an oath he snatched his revolver from its holster."

"Barre," she cried softly. "Barre—Barre!" She partly lifted him in her two hands. Barre's head sagged. His body was numb until he was powerless to move. His legs were without feeling. He could scarcely see. But he heard her voice! It was the same voice that had come to him that day he had felt the sting of the bullet, the voice that had pleaded with him under the rock!

The voice of the Willow thrilled Barre. It seemed to stir the sluggish blood in his veins, and he opened his eyes wider and saw again the wonderful stars that had glowed at him so softly the day of Wakayoo's death. One of the Willow's long braids fell over her shoulder, and he smelled again the sweet scent of her hair as her hand caressed him and her voice talked to him. Then she got up suddenly and left him, and he did not move while he waited for her. In a moment she was back with a basin of water and a cloth. Gently she washed the blood from his eyes and mouth. He scarcely breathed. But Nepeese saw the little quivers that shot through his body when her hand touched him, like electric shocks.

"He beat you with a club," she was saying, her dark eyes within a foot of Barre's. "He beat you! That nian-beast!"

There came an interruption. The door opened, and the man-beast stood looking down on them, a grin on his red face. Instantly Barre showed that he was alive. He sprang back from under the Willow's hand with a

ITCHY PIMPLES ALL OVER FACE Bothered Over A Year. Cuticura Healed.

"I was bothered with pimples for over a year. They were hard and small and scaled over and were scattered all over my face. The pimples itched causing me to scratch and my face was disfigured. I tried other remedies but without success. I sent for a free sample of Cuticura Soap and Ointment and after using it I got relief. I purchased more and in about two months I was completely healed." (Signed) Miss Kathleen Menzies, Northumberland St., Whitney, N. B., January 2, 1925.

Use Cuticura for every-day toilet purposes. Bathe with Soap, soothe with Ointment, dust with Talcum. Sample sent free by Mail. Address: Canadian Dispensary, "Rex" Brand, Ltd., Montreal. Price, Soap 25c, Ointment 15c and Talcum 25c. Cuticura Shaving Stick 25c.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

sudden snarl and faced McTaggart. The hair of his spine stood up like a brush; his fangs gleamed menacingly, and his eyes burned like living coals. "There is a devil in him," said McTaggart. "He is wild—born of the wolf. You must be careful or he will take off a hand, ka sakhet!" It was the first time he had called her that lover's name in Cree—sweetheart! Her heart pounded. She bent her head for a moment over her clenched hands, and McTaggart—looking down on what he thought her confusion—laid his hand caressingly on her hair. From the door Pierrot had heard the word, and now he saw the caress, and he raised a hand as if to shut out the sight of a sacrilege.

"Mon Dieu!" he breathed. In the next instant he had given a sharp cry of wonder that mingled with a sudden yell of pain from McTaggart. Like a flash Barre had darted across the floor and fastened his teeth in the factor's leg. They had bitten deep before McTaggart freed himself with a powerful kick. With an oath he snatched his revolver from his holster. The Willow was ahead of him. With a little cry she darted to Barre and caught him in her arms. As she looked up at McTaggart, her soft, bare throat was within a few inches of Barre's naked fangs. Her eyes blazed.

"You beat him!" she cried. "He hates you—hates you—"

"Let him go!" called Pierrot in an agony of fear.

"Mon Dieu! I say let him go, or he will tear the life from you!" "He hates you—hates you—hates you—" the Willow was repeating over and over again into McTaggart's startled face. Then suddenly to her father, "No, he will not tear the life from me," she cried. "See! It is Barre. Did I not tell you that? It is Barre! Is it not proof that he defended me?"

"From me!" gasped McTaggart, his face darkening. Pierrot advanced and laid a hand on McTaggart's arm. He was smiling.

(To be continued)

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

A Great Manufacturing Centre

Over Thirteen Thousand Factories Located Near Philadelphia

In the metropolitan area of Philadelphia, within an hour's train ride of the city and doing most of their marketing within the territory and a very large part of it in Philadelphia, dwell 3,320,000 persons. Within it are located 13,637 manufacturing establishments, giving employment to 544,300 wage earners, buying nearly two billion dollars worth of raw materials and turning out products valued at more than three billion, four hundred million dollars a year, with an annual wage roll of six hundred and sixty million dollars. Philadelphia alone claims over 9,000 of these factories, employs over 250,000 of the workers, who receive over \$225,000,000 a year in wages and produce nearly two billion dollars worth of manufacturing goods.

Gasoline Stronger Than Dynamite

Few Realize Danger When They Are Using It

The most dangerous, yet the most widely used commodity, without thought of its danger, is gasoline. Five gallons of it has the explosive force of more than 400 pounds of dynamite.

This same amount will evaporate into 5,000 cubic feet of gas which, if ignited, will expand suddenly 3,000 times this space. Yet gasoline is practically harmless except in gaseous form, when mixed with air.

That's how its enormous power is used in internal combustion engines.

Hoping Prince Will Revive British Trade

Manufacturers Believe Trip to South America Will Help Business

With the near return of the Prince of Wales to England, British manufacturers and business men are voicing hopes that something good is coming to them from the Prince's ambassadorship to South America. They are looking to him for some such slogan as King George's "Wake up England" to galvanize drooping industry here.

Godfrey Chasman, secretary of manufacturers, representing 2,000 firms, referring to his expectation of a national appeal from the Prince, said: "Nothing but good could result from such a call which would be welcomed by the workers and equally by the employers."

"Labor as a whole has great respect for the Prince and should he make an appeal his words likely would have great effect with the working people."

"It is significant that he turned his attention while in South America to the situation of the British markets, and I am sure he discovered during his industrial researches that we should protect their markets from unfair competition."

No Longer A Map

Getting First-Hand Knowledge to Teach to Pupils

It would be safe to say that there is no member of the party of British teachers who are visitors in Victoria at the present time who is not thoroughly impressed with Canada and the opportunities it offers to all who have the least enterprise and vision. These educationists are going back to Britain with a new conception of this Dominion. Several of them confessed that they had been teaching their charges about Canada for years in the classrooms, rather piddling themselves that they had been doing ample justice to the theme, but they now realize how much greater and more exhaustive the lesson will have to be when they deal with this country on their return.—Victoria Times.

A LITTLE BOOKLET MOTHERS SHOULD HAVE

It Tells What a Mother Ought to Know for Baby's Sake

Above all things every mother wishes that her child or children, whatever their age, may be bright, healthy, good-natured, rosy boys and girls; clear-eyed, clear-skinned babies; good sleepers, bright wakers. Every mother's wish for her little folks is that they may be well.

It is natural for little folks to be well. No wise mother thinks that her child at any age is in a natural state unless it is well and happy. No mother can expect, though, that the child will escape all the ills to which babyhood and childhood are subject, but she can do much to make baby's battles for health easily won.

A valuable little booklet entitled "Care of the Baby in Health and Sickness" has been prepared, and as it is something every mother should have, a copy will be sent free to any mother on request who will mention this paper by The Dr. Williams' Medicine Co., Brockville, Ont.

If a man tips the scales at 300, his opinion carries great weight with it.

When a boy sees another eating something he always gets hungry.

Put Real Mustard in Your Kit

Right at the top of the list of camping necessities is a tin or two of real mustard.

Men who fish and men who shoot know what a spiciness and flavour mustard freshly mixed with cold water adds to the ham, bacon, fowl, venison and other good things they eat in camp.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

To Avoid Difficulties Attending Germany's Entry Into League

Locarno.—A new move, based on a Canadian precedent, is likely to be made to overcome difficulties attending Germany's entry into the League of Nations because of the objections of the German delegates to obligations involved in Article 1 of the league covenant. The German representatives to the security conference here who have declared clause 16 to be the only obstacle to Germany's acceptance of league membership, have demanded an exact definition of German responsibilities under the clause which deals with economic and military penalties against an aggressor nation should she finally decide on membership.

Among the many suggestions advanced at the present meeting for satisfying the German ideas of Article 16 is the adoption of an interpretative resolution similar to that introduced by Canada on Article 10, the article which commits the members to preservation of the territorial integrity of the other members.

Canada, in her suggestion, was firm in her stand that each nation should only contribute military assistance to such a case when her home parliament authorizes the step.

The Germans want what they termed an "old test" of the league covenant's real meaning before committing the German people to membership in the league.

New York Financier Says Saskatchewan a Sportsman's Paradise

Winipeg.—"I am much impressed with the great future of Western Canada, which is a great country," was the opinion of Bernard M. Baruch, New York financier and one time chairman of the United States war industries board, on his return to Winipeg after a couple of weeks spent in duck and chicken shooting along the lines of the Canadian National Railways in Saskatchewan.

Mr. Baruch, who arrived in his private car from Wadena, Sask., was accompanied by his son, H. M. Baruch, Jr., and George W. Winch, of New York.

"We found the Qu'Appelle valley and Wadena districts a veritable sportsman's paradise insofar as small game was concerned," Mr. Baruch stated. He added that in spite of somewhat inclement weather, the party had enjoyed some of the best shooting at ducks that they ever experienced.

Chickens were somewhat wild and rather scarce and wild geese, which were fairly plentiful, were wild.

New Appointment

Permanent League Post For Canada At Geneva Given Col. Obed Smith

Winipeg.—According to word received here, Col. J. Obed Smith, commissioner of immigration, London, Eng., for the Canadian Government, has been appointed permanent commissioner of immigration to the League of Nations. It is understood that he will leave for Ottawa and Geneva shortly to assume his new duties.

Trainmen Stick To Posts

Wilkesbarre, Pa.—Probably fatally recalled when steam flooded their locomotive, Gus Gelsner, engineer, and Robert Matthews, fireman, stuck to their posts until they had brought their train to a stop and saved their passengers' lives.

Advocates Free Trade For Europe To Maintain A State Of Peace

Washington.—Pointed suggestions made by delegates to the Interparliamentary Union's conference that the Washington Government again take the leadership in promoting reduction of world armaments, were answered by Representative Theodore Burton, of Ohio, in an address before the closing session.

Referring to the desire often expressed by the president for a new limitation of armaments conference, Mr. Burton said "various propositions looking toward the same ideal are being considered in various European conferences, and it would be an intrusion for our president to ask for a conference in Washington while these efforts are being made."

Organizing Another Antarctic Expedition

Captain Wilkins Has Purchased Plane Used By Amundsen

London.—Captain George Wilkins, the explorer, who recently returned to London after thrilling adventures with cannibals in the Far North of Australia, is organizing another Antarctic expedition, which will probably set out in a few months' time. Captain Wilkins has had an adventurous career, including expeditions to the Arctic with Stefansson and to the Antarctic with Shackleton. He has purchased the aeroplane used by Amundsen on his Arctic flight.

"It is more than likely that we shall use the machine in the Antarctic," he said recently. "The Norwegian whalers realize the importance of the work we have in hand, and will help to convey my machine and supplies to the Bay of Whales, whence I expect to start the flight at the end of 1926. We expect to make for Graham's Land and cover 1,500 miles of new coast line."

Prosperity In Britain

Daily Mail Discovers Two Centres Where Trade Is Particularly Good

London.—In these times when so much doleful news with regard to the state of British industry is appearing in the newspapers, it is refreshing to find that The Daily Mail has discovered at least two prosperous centres in the country, Coventry and Leicester. Coventry is described by The Mail as the busiest place in the United Kingdom. The motor car factories there are working at the highest pressure, and The Mail attributes this happy state of affairs largely to the re-imposition of the McKenna duties.

In Leicester the woolen and hosiery trades are said to be showing such improvement that but for the Australian tariff the town would be one of the most prosperous in the whole country.

The factories are working overtime and the export trade is good. The shoemaking industry is also prosperous.

Baseball Idol Passes

Christy Mathewson Dies As Result Of War Injuries

Saranac Lake, N.Y.—Christy Mathewson is dead.

Baseball's "Big Six" lost his fight against tuberculosis just as the game's great climax, the world series, in which he played an all-important part in 1915, had gotten underway in Pittsburgh.

More than five years ago, the great pitcher, loved and honored wherever the game is played, began what was to be a losing struggle.

Gassed in the World War in France, where he served with distinction, Mathewson returned from overseas to coach with the Giants, the club with whom he won his fame, but the illness which was finally to take his life, forced him to retire for recuperation in 1920.

Appointed Minister In London

Peking.—A mandate appoints W. W. Yen a minister to London with the honorary rank of ambassador. It is understood Mr. Yen will not assume his post until after the Chinese tariff conference.

A Move For Peace

Gods of War Receive Rebuffs At Interparliamentary Meeting

Washington.—The gods of war are receiving telling rebuffs. World parliamentary leaders here approved unarmed frontier zones and unanimously called on the United States once more to summon the world to the peace table.

The demilitarizing zone plan was offered to the Interparliamentary Union by the British, with notable unanimity among the 41 nations gathered. The union not only subscribed to the plans for universal peace, but heard delegates of Japan and Great Britain urge the United States to take the initiative. First of the nations to call for cessation of strife was Japan, France, Great Britain and Germany quickly approved.

Great Britain, through R. S. Hudson, declared its willingness to "join with any great powers in any conference for the further limitation of naval armaments or for the reduction of land armament."

Canadians Returning From U. S.

Immigration Officer Gives Figures, But Archdeacon Says More Are Leaving

Winipeg, Ont.—Nearly 300 native Canadians returned to the Dominion from the United States through border city ports during September. It is announced by Orval Adams, inspector of immigration.

Hamilton, Ont.—Deploring what he claimed to be a fact that many Canadians, particularly families from the diocese of Niagara, were leaving the country for the United States, Archdeacon Reinson, of Hamilton, at a session of the Anglican Synod of Niagara, warmly criticized the immigration policy of the federal authorities. The procession of young men and women to United States points were heart-breaking, he asserted.

Arguing Over Treaty

French Official Circles Pessimistic Over Demands of Germany

Paris.—Members of the German delegation attempting to draw up a new commercial treaty between France and Germany handed Charles Chaumet, French minister of commerce, a note containing German proposals, framed with a view to finding a new basis for the resumption of negotiations. French official circles maintain a pessimistic view of the German demands for most favored nation treatment without offering what the French consider adequate reciprocity.

Freight Rate Equality

Adjustment Cannot Be Forestalled Much Longer, Says McGeer

Vancouver.—"The day of freight rates equality in Canada, long past due, cannot be forestalled much longer," said G. G. McGeer, K.C., government freight rates counsel, on his return from Ottawa.

"It will be good news to Vancouver," said Mr. McGeer, "that the Alberta wheat crop will be approximately 130,000,000 bushels. It is not though the snow has had any serious effect."

Turkish Students Stage Demonstration

Constantinople.—The second anniversary of the arrival of Mustafa Kemal Pasha's forces in Constantinople, was observed Oct. 7 as a public holiday. Groups of students paraded the streets and staged demonstrations before the British embassy, shouting "We want Mosul" and "Down with England." No other incidents were reported.

Prince Writes A Play

Stockholm.—Prince William, King Gustav's younger son, known as Sweden's royal poet-playwright, has completed a new play, which has been accepted for production by the Royal Dramatic Theatre. It is titled "On Board," and deals with life at sea, of which the prince has had considerable experience, having been trained for the navy.

Rumors Are Denied

Saskatchewan Co-operative Elevator Co. Refute Stories of Loss

Regina.—In view of rumors alleged to have originated in Winipeg, that the Saskatchewan Co-operative Elevator Company sustained a heavy loss in handling last year's crop, the following statement was authorized by the company:

The policy of the Saskatchewan Co-operative Elevator Company is to make its financial statement public at the annual meeting of shareholders which will be held December 16 in Regina. The statement of the company's operations for the financial year 1924-25 will be going forward to all shareholders within the course of a few days however. The fact that a dividend of eight per cent. for the financial year 1924-25 which ended July 31 last, was declared and paid in August last amounting to approximately \$190,000, is a very clear indication that the company's operations last year were on a very successful basis.

Ready To Reduce Armaments

Britain and Japan Willing to Join in Action

Washington.—While the Interparliamentary Union resolved to sponsor movements for world disarmament and protection of troublesome national border lands, spokesmen from the British and Japanese groups declared their government were ready to join with others in a concerted action for further reduction of armaments.

The resolution on armaments reduction, reported by Dr. P. Munch, of Denmark, expressed regret that expenditures for armaments by "most countries" showed a "serious increase," stated the necessity of giving nations a feeling of security, and called for a thorough examination by a special sub-committee of methods for reducing armaments, including the drafting of a technical scheme to bring this about. It was adopted without dissent.

How To Save

Interesting Booklet on Yearly Purchase Plan An Aid to Small Investors

An interesting and valuable little booklet is published by Burnett, Smith & Co., investment bankers of Montreal, setting out an excellent plan whereby the public of Canada may buy good securities and pay for them over a period of one year. The object is to cultivate the habit of saving money among people who have never been accustomed to buying securities, and to show them how profitable it will be for them to invest their savings in this way and spread the payments over a year.

Good securities can be bought on this plan, with all the opportunities of taking advantage of market variations, and yet the investor has an entire year in which to pay off the balance due on his account. Under this plan, the investor pays 25 per cent. of the purchase price on placing the order, and the balance, including the customary interest, in eleven equal monthly instalments. The book outlining this plan can be obtained upon application to the company at its Montreal office, Canada Cement Building, Phillips Square.

Saskatchewan Dairy Pool

Intensive Campaign For Members To Be Launched At Once

Regina, Sask.—Canvassers working on a commission basis will launch a sign-up campaign for contracts in connection with the Saskatchewan Dairy Pool Limited, which has opened headquarters in this city.

The territory to be covered includes a radius of about fifty miles north and south of Regina between the Capital City and Moose Jaw, and east to the Manitoba boundary. The pool will not operate according to the contract until 75 per cent. of the dairy products shipped to the Regina market have been signed up. November 1 is the closing date, but the directors have power to extend the time limit another 60 days.

Many Canadians Are Returning To Canada From United States

Saskatchewan Wheat Pool

Date Is Set For the First Annual Meeting

Regina.—Saturday, November 21, was the date set for the first annual meeting of the Saskatchewan wheat pool delegates when the directors met at the Regina headquarters. Each of the 16 pool districts in the province will send ten delegates to the annual meeting, which will be held in the City Hall, Regina.

Preparations are now being made for the election of the 1926 pool delegates. Nomination papers are in the mail for the secretaries of all pool locals. They are returnable not later than 6 p.m. Monday, November 22. The elections will close Monday, November 23.

Immediately nominations have closed, ballots will be sent out to the 68,000 shareholders in the pool. Any six contract signers in the pool can nominate a candidate for election as a delegate, and the local secretaries have been requested to call nomination meetings.

Probing Tangle In Europe

Committee of Interparliamentary Union Will Investigate Economic Barriers

Washington.—The Interparliamentary Union conference, in third session here, adopted a resolution calling for an investigation of economic barriers between European nations, with a view to their ultimate extinction.

The resolution, which was adopted without objection, was introduced by H. J. Procope, of Finland, as a substitute for one presented by Adolf Braun, of Germany, recommending the creation of a customs understanding between European nations.

The Procope resolution directs a sub-committee of the conference to undertake an economic and financial study of the problem and report to the next conference.

Cattle Rates Not Changed

A Question of Space on Vessels to Handle the Business

Medicine Hat, Sask.—"It is not a question of rates, but space," said Hon. W. R. Motherwell, federal minister of agriculture, when questioned whether the freight rate per head of cattle would be lowered by allowing the larger shipments provided under the new arrangement with the British Government.

"We have arranged with the British Government to allow the four-deck boat which will take care of the business offering. But rates are a different matter. We shall have to get after the combine later."

Arrests Ensure Peace

Peking.—A mandate has been issued ordering the arrest of several politicians in the province of Chi-li, who are alleged to have been urging General Wu Pei Fu to return to Hunan and renew the civil war. It is believed here that the arrests are likely to ensure peace for several months.

Winipeg, Ont.—Fifty thousand Canadians resident in the United States more than six months returned to take up permanent residence in Canada during the month of September, Hon. George H. Gordon, minister of immigration, declared at a public meeting here.

In the same period about 1,800 persons entered Canada from the United States as immigrants, the minister declared, bringing with them cash and effects to enable them to begin farm operations in Canada.

While the movement to Canada is increasing the movement of Canadians to the United States is falling off rapidly, the minister said.

Debaters To Tour Canada

Quartet of Students From Britain Will Visit Dominion

Montreal.—The first purely imperial tour of universities' debaters will be inaugurated early in the new year, when a quartet of students representing four of the largest universities in the United Kingdom will visit Canada and traverse the country from coast to coast, holding debates with teams from practically all the Canadian universities.

The range of subjects to be debated is wide and of a decidedly imperial character. Of these the Old Countrymen will uphold the resolution that "Western civilization is on the downgrade," while another subject in which they will take the affirmative is: "Resolved that a naval base should be established at Singapore and that the dominions should establish naval squadrons in the Pacific."

The Britons will land at Saint John, N.B., early in the new year, and after taking on the universities of the Maritime provinces and of Quebec and Ontario, they will be at Winipeg, Regina, Edmonton and possibly Calgary, finishing up at Victoria, B.C.

They probably will sail from Vancouver for the Antipodes, where they will engage in verbal encounter with representatives from the universities of Australia and New Zealand.

Made Long Journey

Mounted Police Patrol Covers a Record Distance

Ottawa.—A patrol, covering a distance equal to approximately that from coast to coast, has been completed by the Royal Canadian Mounted Police in the past year in the Cumberland Gulf-Ballin's Land district. Four police under Sergeant Wright traversed on one trip alone 2,320 miles, travelling with dogs and sledges. One of the objects was to survey conditions at Keewato, where two missionaries were murdered last year by Eskimo families. The settlement was found orderly and free from crime since an example was made of the offenders.

Closed Halibut Season

Vancouver.—At the closing session here of the international halibut commission it was decided to again enforce the closed season on halibut for the next two years, the dates being from November 15 to February 15.

Britain As Mediator Between France And Germany At Conference

Locarno. A new incident believed to be of vital importance in its bearing on the success of the Locarno security conference came in the form of a long private meeting between Foreign Minister Stresemann, of Germany, and the British foreign secretary, Austen

Chamberlain, like Chancellor Luther and Foreign Minister Briand, of France, Dr. Stresemann and Mr. Chamberlain not only discussed the problems immediately before the conference, but the whole range of European questions on which mutual understanding and agreement are essential before official cooperation can be achieved.

Mr. Chamberlain is anxious to serve as mediator between the opposing views of France and Germany on the problem of a French guarantee for Poland. The two statesmen went over this matter in an endeavor to find a formula.

Shoots Crazy Bear

Lethbridge. An 800-pound grizzly bear, for several years the terror of the foothills cattle country, has been shot and killed by V. Nixon, Parkview. The grizzly has killed scores of young stock and has long been sought by hunters.

The Day is Done and the Darkness Falls from the Wings of Night

A view of Portage Island, at the entrance to Saint John (N.B.) harbor, taken from the deck of a Canadian Pacific steamship as, at eventide, she approaches the end of her journey.

Problems Of War Hates

Every Effort Should Be Put Forth To Dispel War Antipathies

Scientific circles in Britain are endeavoring to come to a decision on the question of admitting German delegates to next year's gathering of the British Association for the Advancement of Science. The question has been before the association for five years. At recent meetings of this body at Southampton the committee of recommendation decided by a narrow majority in favor of admitting Germans. The general committee decided, also, that invitation next year should be issued irrespective of nationality, and the next move, it is pointed out, rests with the general council of the association, which meets in November.

Grounds put forth by opponents of the proposal to issue invitations to German delegates to attend the association will be recognized, and doubtless appreciated, yet it would seem doubtful if any good purpose would be served by barring men of science from Germany from these meetings. It is not difficult to understand how hates engendered by the war should still survive, nor is it forgotten how German science was brought to bear on the side of the Germans against the British and other allied powers in the conflict. Yet should not every possible effort be put forth to dispel war antipathies that still may lurk? Indeed is there not an actual danger to world peace by perpetuating these feelings of hostility. The present is a time for men of science to be devoting their skill to the cause of peace, and it would seem that by international co-operation along this line, which is born of such contact as is proposed by the inviting of German scientists to the British convention, great projects of science would be helped along rather than hindered.

Germany in the past has had much to offer to the world in matters of science. Her explorations in this great field have been important and beneficial. A recent tabulation of the awards of Nobel prizes in physics, chemistry, and medicine for the past quarter of a century shows that Germany leads with 21 prize winners, France coming second with 12 winners, and England third with 11.

The Great War ended with the signing of the Treaty of Versailles, and while it may be difficult to banish entirely in the few intervening years the hatreds unkindled by the conflict, if the world is to be made safe for peace and good will, it would seem unwise to neglect opportunities for the healing of old wounds and for the advancement of civilization such as offered in the present case.—Regina Post.

The World's Largest Cities

London Still Maintains Her Place As The World's Greatest Metropolis

The question whether London or New York is the largest centre of population in the world has given rise to considerable differences of opinion. American authorities claim that the metropolis area of New York has a population of eight millions, putting it several hundred thousands ahead of the British metropolis. But the Encyclopedia Britannica, in its last edition, says that London in 1921 was still the largest city in the world, surpassing greater New York by at least one and a half millions.

It is clear that New York cannot have wiped out such a large margin as one and a half millions during the last four years. The London metropolitan district is probably larger than the New York metropolitan district, but Americans often refer to a metropolitan "area" that embraces population outside of the organized district.

Berlin is the third largest city in the world. Chicago boosters say that the Illinois city, which is growing rapidly in spite of its high percentage of violent deaths, has passed into fourth place, leaving Paris behind.

"It is human to boast about size," the Toronto Star says, "but big cities show civilization at its worst as well as at its best. Living conditions decline as cities leave the million mark behind. The comfort and happiness of the people and not their number are what really matters."

Cut Interest Rate

Manitoba farmers will be able to obtain cheaper money from the Manitoba Farm Loans' Association, the interest having been reduced one-half of one per cent. Premier Bracken announced. This makes the rate 6 1/2 per cent. The premier said the government desires further lowering of the rate, which will be possible if borrowers meet obligations promptly.

If you can't go on an excursion train, you can get the same effect by borrowing seven children and putting a cluder in your eye.

W. N. C. 1598

Chief Cause Of World War

Viscount Grey Says Mutual Fear Was Principal Factor

"Mutual fear," in the opinion of Viscount Grey of Palladoon, was the chief cause of the world war.

Viscount Grey, who as Sir Edward Grey, was foreign minister at the outbreak of the war, has published his memoirs. Developing his belief that fear caused the conflict, he describes as follows the principal factors leading to the clash of 1914:

1. Germany had no reason to fear anyone after the war of 1870, but she built up her armaments and formed the triple alliance, so that she might never have reason to be afraid in future.

2. France, naturally, was afraid after 1870, and hence formed the dual alliance with Russia.

3. Great Britain, with a small army and a large empire, became first uncomfortable and then afraid of being isolated, particularly when Germany began building her big fleet. Hence Britain concluded the Anglo-Japanese alliance, patched up her quarrels with France and Russia, and joined the entente.

"Finally," Viscount Grey continues, "Germany became afraid that she would presently be afraid, and she believed her power was at its height."

Viscount Grey doubts whether Europe even now is penetrated with the sense that war must be prevented in the future.

Still Active Although Over One Hundred

Independence Is Characteristic Of Cheerful Little Irishwoman

Aged 102, Mrs. Mary Agnes Haddican, walked from her home in Holloway in the suburbs of London, England, to the Royal Northern Hospital, for treatment for an ingrowing nail, and after attention walked back home unaccompanied.

Mrs. Haddican, is a grey-haired, cheerful little Irishwoman. She is able to live in comfort on the state old age pension, but this is largely due to the kindness of several shopkeepers in Holloway, who among them supply most of her needs without expecting a penny of payment. Mrs. Haddican's husband died 50 years ago, and all her seven children are dead. Save for slight deafness she is in possession of her faculties and is still independent of glasses when reading or sewing.

Independence, indeed, is her principal characteristic, for she still does all the housework in her small home. On Saturday she spends the whole time from nine to five in giving her little bed-sitting room its weekly cleaning.

Efficiency In Aviation

Europe Seems to Take Lead Over Other Countries

In the matter of efficiency in aviation Europe is far in advance of any attainment on this continent. Thus, Captain Arrachart the other day scheduled a three-day circuit of Europe by aeroplane. He went on the journey touching Belgrade, Bucharest, Constantinople, Moscow, Warsaw, Copenhagen and thus apologized at the end of the journey: "Gentlemen, I beg your pardon; I have arrived five minutes behind time." He had planned his flight of three days' duration, and 7,500 kilometers in distance, to end at the Paris flying field of Villacoublay at 9.15. It was almost 9.20 when the plane slid out of the air, permitting the aviator and his mechanic to alight. The trip had been completed without a single mishap or miscalculation, the men showing not even signs of fatigue. The journey was taken in three daily flights of 11 hours 15 minutes, 12 hours 15 minutes, and 15 hours 30 minutes.

An Unnecessary Waste

The particularly well-looking man entered the doctor's consulting room and took a chair.

"Well, what can I do for you?" asked the doctor.

"I don't think much of that cough medicine of yours," answered the man. "I'm sorry to hear that," was the reply. "What is the reason?"

"Why," said the other, "there's so much dead waste in it. I hadn't taken more than a quarter of a bottle when my cold disappeared, and there is the other three quarters just thrown away."

This Car Came Back

The home-loving cat of popular fame has nothing on Maurice Paul's automobile. Stolen a few days ago from the curb in front of Paul's house in New York, it went dead at the same spot as it was being driven past by the now possessor. The driver was arrested when he returned with a fresh supply of gasoline.

It is not always wise to tell all one knows, but it is well to know all one tells.

Million Motor Vehicles Made In Canada

Industry Is Assuming Larger Proportions Than Ever

That over a million motor vehicles have been manufactured to date in Canada is one of many interesting facts relating to the automobile industry contained in a booklet "Facts and Figures of the Automobile Industry in Canada," recently published by the Automotive Industries of Canada, the trade association of manufacturers of motor vehicles, tires, parts and accessories in this country.

Automobile manufacturing has been carried on in Canada continuously for just twenty-one years. Ten years ago the industry assumed large proportions and today it stands in the front rank of the Dominion's industrial enterprises.

More than a hundred thousand Canadians are now employed in relation to the industry and its products, and over half a million persons in Canada are dependent on the manufacture and use of motor vehicles.

There are only two countries in the world—the United States and Great Britain—in which a greater number of motor vehicles are owned than in Canada; while in proportion to population—one car to every fourteen persons—the Dominion of Canada ranks next to the United States.

In value of Canadian products of all classes the automobile industry stands seventh. At the top naturally are the agricultural products, first being flour and grain mill products, then pulp and paper; third, meat products and so on. It is interesting to note, however, that while the industry stands seventh in total value of production, it stands fourth in value of exports, being surpassed only by grain and grain products, pulp and paper products and wood and wood products. All of these three are specially related to Canada's natural resources, and the development that has taken place in export business of the motor industry is remarkable in that Canada has no special advantages for manufacture due to availability of necessary raw materials. It is also interesting to note that while for a number of years imports of motor vehicles were large, Canada has now exported twice as many motor cars as have been imported and this tendency should continue more and more marked in the future.

The First Notaries Public

Notaries public are said to have been appointed by the fathers of the early Christian Church to collect the acts or memoirs of the lives of the martyrs of the first century. This office was afterwards changed to a legal employment, to attest deeds and writings, so as to establish their authenticity in any country. In the province of Quebec the notaries form a branch of the legal profession. Their acts are official.

Exempt Elevator From Taxation

Victoria's citizens by an overwhelming vote have decided to exempt the proposed million-dollar Panama-Pacific elevator at Ogden's Point from taxation, says the Victoria Colonist. The mayor of the city led an appeal to the electorate to take this step in order to support a project which it is hoped will be the foundation of a great grain shipping business from the island port.

A man's egotism may be pardoned if it doesn't degenerate into vanity.

Super-Cattle For The North

Experiments In Breeding Of New Type From Buffalo and the Yak

Will the bison that once covered the prairies, monarchs that are now confined in their meagre thousands by the fences of national preserves, be perpetuated by their contribution to a new strain of super-cattle—that is, super-cattle for Far Northern Canada?

That is a question that is often asked seriously when practical men discuss the experiments that have been carried out at Wabowright, where the Canadian Government keeps the largest buffalo herd in the world, now numbering more than 8,000 head.

Briefly, the intention of the experiments in cross-breeding has been to produce a hardy type of cattle, developing some of the characteristics of the buffalo, and with ability to "scratch" for themselves on winter pastures that lie in the sub-Arctic. The idea was to toughen a breed that could be raised successfully and pastured in territory where ordinary cattle cannot stand rigorous conditions.

The results have been interesting; but, of course, it may be some years before anything conclusive is worked out. Under A. G. Smith, superintendent of the park, Jim Wilson, who has been in charge of the cattle ranch, is the man who has carried out the practical end of the experiments.

The first cross-breeding tried was with a buffalo cow and a domestic bull. The result was called a cattalo. This animal developed some of the characteristics of the domestic short-horn, but the buffalo predominated.

Then the yak, the buffalo of India, which is used there as a domestic animal, came on the scene and was introduced into this mixture of family blood. It was believed that the yak occupied the place of "missing link" between the buffalo and the domestic beef.

According to the officials in charge, the most promising cross-breed yet produced is the cattalo (result of a cross between the domestic and the bison) when crossed with the yak. This cattalo-yak gives promise of approaching what the experimenters first hoped for. Then there is the cross-breed between the yak and the domestic animal. The calf of this union grew at a tremendous pace, and within twelve months was as big as its mother.

In addition to buffaloes, there are also, moose and deer on the big Wabowright Reserve. It is also a bird sanctuary.

The Signal Of Peace

Why does a dog wag his tail? A scientist answers that it is the wag signal of peace, which has been handed down from the days when most dogs were enemies of each other. The term, "white flag," comes from this habit of the dog, he says, and explains that if there are any white spots on a dog, one of them is most sure to be found on the tip of the dog's tail.

Creation Of World

An English geologist, addressing the British Association, said that the crust of the earth is between one and ten billions of years old. But Archbishop Usher fixed the date of the creation of the world for Oct. 4, B.C. 4004. It must be admitted that the theologian's knowledge was more exact than that of the scientist.—Hamilton Herald.

Distance That Is Hard To Realize

Mind Cannot Grasp Remoteness Of Some Stars Known To Astronomers

If a telegraphic message could be sent to the moon, it would reach its destination in a little more than a second. It would take something like eight minutes to arrive at the star, but how long, do you think, would it take to reach the star called Alpha Centauri, travelling thither 180,000 miles a second? Seconds, minutes, hours, days, weeks, months, would not be long enough; it would take no less than three years, travelling all the time at that tremendous pace, before it would reach its destination. If that is the case with respect to the nearest of stars, what must be said of those further off?

There are stars so remote that if the news of the victory of Wellington at Waterloo had been flashed to them in 1815 on the celestial telegraph system, it would not have reached them yet, even if the message had sped at the rate of 180,000 miles a second, and had been travelling all the time; that is, when William the Conqueror landed in England in 1066, the news of his conquest had been dispatched to them, and if the signal flew over the wire at a pace which would carry it seven times round the earth in a second of time, the news would not have reached them yet.

Even if the glad tidings of that first Christmas in Bethlehem, nineteen centuries ago, had thus been disseminated through the universe, there are yet stars of which astronomers could tell us, plunged into space in depths so appalling that even the 1924 years which have elapsed since would not have been long enough for the news to reach them, though it travelled 180,000 miles every second!

Tourists Anxious To See Prince's Footmark

Made Years Ago In Fresh Concrete At Castle In Scotland

Tourists are flocking to the Aberfeldie Castle in Scotland, the official Highland home of the Prince of Wales, though he has never spent much time there. They want to see the "Prince's footmark," until the past year, a secret known only to the Prince, an elderly woman and a former London policeman.

The incident happened when the Prince, at the age of seven, was staying with his father and mother at Aberfeldie. He had been having a concrete floor laid around the castle. One morning the Prince ducked under the barrier and before the housekeeper and policeman who were with him could call a warning he had made a footprint in the fresh concrete, which still retains the impression.

The escapade was kept a secret until last year, when the former policeman told some visitors of it. The latter apparently spread the story, hence the rush of curiosity seekers.

A Pat Reply

In a Wexford church, the minister announced his text, "Paul we know and Appollos we know, but who are these?"

Just then the verger was showing two strangers into a pew, so in an audible whisper he said, "Two commercial travellers from White's Hotel, your reverence."—Western Christian Advocate.

Trafalgar Square, Closed for First Time in Twenty Years

To improve the appearance of this famous rendezvous at Charing Cross, the contractors have boarded up the sides of the Square preparatory to repaving with a new floor of sandstone. The above photograph, which was taken from a window in the European offices of the Canadian Pacific Railway, shows the boarding around the Square and the use to which it is being put by the enterprising officials of Wembley.

Causes of Crime

By Rev. J. Phillips Jones, M.A., B.D., Social Service Council of Canada

In addition to poverty which was mentioned in a previous article another cause of crime is—Intemperance. If the sale of hard liquor was prevented, the police courts would lose a great deal of their business. At a recent meeting of police inspectors in New York City, one experienced officer said that "Drink is the greatest single cause of crime." Lord Alverstone, chief justice of Great Britain, said, "After forty years at the bar and ten as a judge, I have no hesitation in saying that ninety per cent. of the crime in this country is due to indulgence in strong drink."

Addressing the grand jury in Winnipeg some time ago the judge said, "Most of the cases in these assizes are directly or indirectly due to liquor. Especially does this apply to the foreign-speaking population who are industrious and hard-working when sober, but are like wild beasts when under the influence of liquor." Maclellan and Mrs. Lassandra paid the extreme penalty for shooting a policeman in Halmore, Alberta, because he interfered with their bootlegging traffic. And so we could multiply instances of strong drink being one of the great causes of crime.

Another cause of crime is addiction to habit-forming drugs. "The great majority of drug addicts are of the underworld type." F. W. Cowan, of the opium and narcotic drugs division of the federal department of health, says, that although the evil is somewhat abating in Canada, one of the greatest needs is compulsory treatment of drug addicts. In this way alone will the evil be finally eradicated.

Feeble-mindedness is also a great cause of crime. "Half the crime of the world, two-fifths of venereal disease, two-thirds of prostitution are due to neglect of the feeble-minded." Recent psychiatric examination of the inmates of Sing Sing prison shows that two-thirds are mentally defective.

There are five hundred mentally defective children in Alberta. Miss Dauphinee, superintendent of special children's classes in Vancouver, reports that there are over sixteen hundred mentally defective children in British Columbia, and the number is rapidly increasing. This is a problem in every province of the Dominion.

A mental defective is one whose brain development has halted. He has the body of an adult but the mind of a child. Some are idiots—mentally these are infants. Others are imbeciles having a mental capacity of from three to six years. The highest grade of feeble-minded are morons. These can be taught expert manual labor under proper direction if it involves no planning or reasoning.

All mentally defective lack control. They naturally drift into immorality and crime. Their immoral tendencies make birth rate among them very high and their defect is terribly transmissible.

At least three persons in a thousand are feeble-minded. The untrained feeble-minded do not work, and the rest of us are supporting them. The problem of the feeble-minded must be grappled with in earnest. By colonization where they will not be able to propagate, we must stop breeding criminals.

How many feeble-minded are there now in the provinces of Canada?

How many will there be in twenty years?

Lumber Industry Loses

Drastic measures will be attempted in an effort to curb the heavy loss caused to the lumbering industry of Ontario through accident, according to Hon. Dr. Forbes Godfrey, minister of health, who places the yearly cost at about \$1,000,000. Last year 20,000 men were employed in the industry, he states, and of this number 4,724 were injured. The costs consequently to such accidents, such as medical care and workmen's compensation, added fifty cents to the cost of each thousand feet of lumber and thirty cents to the cost of each cord of pulpwood.

Cheese Production

The production of cheese in Canada in 1921 totalled 151,673,880 pounds valued at \$24,518,731 according to the Dominion bureau of statistics. Compared with the preceding year an increase of 49,504 pounds is shown in the quantity, but a decrease of over four million dollars in the value. The average price per pound was 16 cents in 1921 and 19 cents in 1923.

Fighting For Planes

Nets for aeroplanes is the latest plan of the anti-aircraft defence. Fastened between parachutes the nets are shot upward in bombs. When the bombs burst high in the air, the parachutes open, spreading the nets in the path of the enemy planes.

Many a good detective makes light of his ability as a shadow.

WORLD HAPPENINGS BRIEFLY TOLD

The U. S. led the world in the number of smallpox cases in 1924.

Skeletons and relics dating back to 1000 B.C. have been excavated from Indian ruins at Purley, N.M.

Two soldiers who were among the first hundred of the Canadian Expeditionary Force in the war, have died in Toronto.

The post office has issued a warning that all persons who desire to send Christmas presents to the Old Country should mail them long in advance.

The London newspapers are irritated over the temporary debt settlement reached between France and the United States. They express the fear it will react most unfavorably on France's debt to Britain.

The new Basilica of Notre Dame de Quebec, built on the site of the former edifice which was destroyed by fire December 22, 1922, was officially inaugurated Oct. 4, with the celebration of Pontifical Mass.

Dr. J. P. Molloy, of Morris, Man., former Liberal member in the House of Commons for Provencher, Man., has been appointed to the senate, to fill the vacancy caused by the death of the late Senator George Bradbury, of Selkirk, Man.

Seeking a site on which to erect a monument to James Evans, who, as missionary in the early forties, contributed much to the civilization of the native Indian, a deputation waited on Premier Bracken of Manitoba. Mr. Evans was responsible for the introduction of the Cree Syllable.

SMP ENAMELED SINKS

A Real Sink for \$13.00

Up to now kitchen sinks have cost real money. Now, at low cost, you can put in the newest type SMP Enamel Sink. This is a strong sink built of rust resisting Arisco Iron, with three coats of purest white enamel, same as on bathtubs. Complete with 12" back, strainer, brackets, fittings, and full directions for setting up. Standard size 20" x 30" x 6" deep.
Price, complete, \$13.00

Buy one or two of these SMP Enamel Sink Drain Boards also. Made to fit SMP Sinks and all standard sinks. Size 20" x 24". Same sturdy construction as on SMP Sinks. Very handsome and a great labor saver. Sold complete with brackets and fittings for setting up.
Price, complete, \$6.50

For sale by plumbers and hardware stores throughout the country.

Gallantry Of British Captain

Left Course to Deliver Medicine to German Ship

A British liner left her course to seek a German ship to transfer to the former enemy a tiny package of rare anti-toxin necessary to save a woman's life. The action of Captain Gemmel, of the Tuscania, in turning back on this mission of humanity calls "one of the most gallant acts ever performed by a captain of a merchant vessel." And yet a few short years ago the two men, both naval reservists, would have been as eager to sink each other's ship, with all aboard, as they were this week to co-operate in aid of a single passenger stricken in mid-ocean. Loyalty to strange gods makes human beings sponsor curiously inconsistent actions. But there is one loyalty, that of gallantry in time of need, in which the British merchant seaman is seldom known to fail.—Baltimore Sun.

Life Of Canadian Parliaments

Shortest Was One Year and Four Days, Longest Was Six Years

Ottawa statisticians report the actual life of Canada's fourteenth parliament, which was dissolved on September 5, as three years, eight months and thirty days. The shortest parliament in point of time was the second after Confederation, which sat for one year and four days. The twelfth parliament established the record for longevity by carrying on its work for six years.

Four Canadian parliaments have sat through five sessions, two have held six sessions, and the twelfth parliament (war-time government) held seven sessions during its six years in office.

ECLIPSE FASHIONS
Exclusive Patterns

Ensemble Suit of Unusual Smartness

There is no getting away from the completeness, the comfort and the harmony of the ensemble costume. The model pictured here is developed in kashmir flannel and printed silk of an unusual design. The straight-line frock features, the all-round circular flare of its flannel matching the coat. The unlined flannel coat has a collar of white lapin fur, which is tacked on to the cloth collar and may be omitted. The diagram shows the design of the dress, and long sleeves are provided in the pattern. The frock, No. 1052, is cut in sizes 34, 36, 38, 40 and 42 inches bust. Size 38 bust requires 4 yards of 36-inch, or 3½ yards of 54-inch material. The coat, No. 1052, is cut in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 4½ yards of 40-inch, or 3¾ yards of 54-inch material. Each pattern 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity, and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

What Pretty Girl Did for Sick Stomach

Miss E. Rich of Brooklyn, N. Y., says: "I don't know what the cause was, but every few days my stomach would feel all bloated up with gas, my appetite was poor and I felt sick to my stomach—to say nothing of headaches."

"I never thought of using Carter's Little Liver Pills until nothing seemed to help. After using Carter's I felt relieved at once—and now as soon as my stomach 'talks' back I answer with Carter's and have the last word."

Treasure Laden Galley Found

Must Have Foundered After Italian City Was Submerged

Archaeologists explaining the drowned city, found by a diving fisherman off the east coast of Tunis, have made a discovery of great interest.

Sir Denison Ross, director of the School of Oriental Studies, who was in Tunis last spring, told a London newspaper representative that the workers have found that a Greek galley, heavily laden with treasure, lies across one of the streets in the city.

As it is obvious that the galley must have foundered subsequent to the swamping of the city, the discovery will help to place the date when the Mediterranean submerged the busy streets.

The dead city lies between the island of Jerba, known as the Isle of the Lotus Eaters, and the coast; and it stood once in all its splendor—while Rome and Carthage still contended for the Empire of the World, or earlier still—between what is now the island and the mainland, before a swift current swept city and isthmus away.

Too Busy To Spend Money

How President of Baldwin Locomotive Works, Philadelphia, Accumulated Wealth

Samuel Vauclain, president of the Baldwin Locomotive Works, Philadelphia, accumulated money because he was too busy to spend what he earned.

"If you take too much time off to spend your earnings you cannot accumulate, and it is intended for one to accumulate," he told 700 pioneer workers in Duluth Industries.

"I early recognized that it was my business and my duty to do all the work which came to me to do in the very best manner that I was able to do it and without any regard for the compensation which I received for it. I saved money. I always saved money. And why? Because I never had time to spend what I earned, and it accumulated."

The ferryman, while plying over a water which was only slightly agitated, was asked by a nervous lady in his boat whether any persons were ever lost in that river.

"Oh, no," said he, "we always find 'em again next day."

End of Boycott Seen

The end of the Chinese boycott against British shipping was seen when ships began arriving at Amoy with cargo and took aboard hundreds of laborers for the Singapore rubber plantations.

The New Habit

It has come to be the habit with some persons that they think themselves hard up when they can't buy all the things they want but don't need.

It is useless for a man to seek a steady job if he isn't that way himself.

Farmer Kills Five Lions

Man in Transvaal Believed To Have Broken All Records

Lion shooting records were all recently broken by a Transvaal Boer farmer. He was with his wagon and eight donkeys near a stream. Suddenly the donkeys stampeded, but it was not until dawn that he saw a large male lion feasting on one of his dead animals two hundred yards away. He fired and killed the beast. Immediately a female lion rushed at him. The farmer stopped its rush within ten yards by a shot through the head. Then he began to search for his missing donkeys, and discovered at different spots within half an hour, three other lions feasting on another donkey they had killed. He shot all three, and with his remaining donkeys pulling the wagon he arrived home with five lion skins.

OUR CROSSWORD PUZZLE

- Horizontal
- 1—Withdraw.
 - 7—Procession.
 - 13—Disclosed to view.
 - 14—Language of Arabians.

 - 52—Prefix: down.
 - 54—Exclamation.

Why Marriages Are Fewer

Francis Gribble, in the London Sunday Pictorial

Rightly or wrongly—but for various reasons—the young women of today, with few exceptions, are less anxious to marry than their mothers were because they have a better time than their mothers had as spinsters.

They have no need to marry for liberty, because they are free as air already, and they have no need to marry for the sake of a home because so many careers are open to them and because there are so many residential clubs in which the bachelor girl can take her ease and enjoy her independence.

Taking their ease and enjoying their independence in this way—provided also with untrammelled opportunities of flirtation—they tend to acquire expensive tastes, and the possession and display of those expensive tastes affects not only their own view of marriage but also that of the men who meet them and are attracted by them.

It confirms the girls in the belief that only men of assured position who can afford to gratify these tastes are worthy of them. At the same time it frightens away suitors, not in an assured position, unable to gratify them, and reluctant to face the reproaches of a wife who has come to regard their gratification as an integral part of woman's right.

And so, as men of assured position are scarce in this impoverished land, the marriage rate diminishes.

Shrunk in the Wash

The teacher was giving a nature lesson on sheep. She explained that before they are sheared they are washed, brushed and combed. "Then she showed the children pictures of a sheep, asking if any child could explain to her why the lamb's tail was so much longer than the sheep's?" There was silence, then—"The sheep's tail shrunk in the wash," said Joan, aged five.

There are more telephones in 10 American states than all other countries combined.

News Notes

Farmers in the province who in-
tend exhibiting seed grain at the
International Hay and grain Show
at Chicago in November are re-
minded that their entries should be
in the hands of officials of the De-
partment of Agriculture at Ed-
monton not later than November
3, in order that they may be in
proper hands at Chicago in plenty
of time. The actual exhibits
should be shipped to the Provincial
Seed Cleaning Plant at Edmonton
for shipment to Chicago.

The annual swine club contests
for boy and girl members of swine
clubs in central and northern Al-
berta will be held at the Edmon-
ton Stock Yards, November 5 and
6. A total of \$1,200 is being offer-
ed in prizes for these contests, in
which some 70 members of clubs
are expected to participate. The
contestants will be guests of the
Alberta Swine Breeders associat-
ion at a banquet, and the associat-
ion is also giving three medals, for
the members of the highest scoring
team. The competitions being
held by the C. P. R. and C. N. R.
for teams from points on their re-
spective lines will be held at the
University on November 6. The
provincial department and the
railways assist in paying fares of
contestants to Edmonton.

Three contingents of British farm
boys are en route across the Atlan-
tic for the Alberta agricultural
schools. Advice to the depart-
ment of agriculture state that a
party of 20 left October 9, on the
steamship Regina, for the Vermil-
ion school, 21 on the same date,
S. S. Montclare, for Olds, and 24
on October 10, S. S. Ansonia for
Clareholm. In each case the par-
ties are routed through direct to
the three schools. It is expected
that with the British boys, the
registration at the three schools
of Agriculture this year will run
close to 400.

Red Cross Campaign

This autumn comes your chance
to help Red Cross for better con-
ditions.

You will be asked to support the
following services:

In Outpost Hospitals—1,525
Patients nursed, 355 Babies born.

In Schools—15,000 Children en-
rolled for Health.

In Immigrant Service—739 Set-
tlers Families served.

Through the Junior Red Cross—
425 Crippled and sick children
cared for.

In Home-Nursing—50 Districts
served with classes for Mothers and
Home-Makers.

In Health Education—Lectures
by Radio, by lantern, Literature
by mail.

Join this Service for Humanity—
Give the sick child a chance. Safe-
guard the settlers from ill health.

Canadian Products Arriving at Southampton

Upper—How the cargo is stored ready for the consignee, showing one of the new electric trucks in action. Inset—Typical British longshoremen, who handle the cargo. Lower left—Unloading cargo from the "Empress of France" at Southampton. Lower right—Canada's products arriving in England for distribution.

to deal with all the increased traffic which has come their way in a most efficient and satisfactory manner.

The appliances for handling cargo of this descrip-
tion are of the most up-to-date character, and the
methods employed are such as to guarantee to the
consignees of the goods the most prompt and careful
despatch. As can be seen from the photographs we
reproduce one of the improvements adopted by the
port authorities is the transporting of goods from
ship's side to shed by means of electrically driven run-
about trucks, which results in a great saving of time
and labor, and also reduces the amount of handling
to which the goods are subjected, and so minimize
the risk of damage.

The system of road transport from Southampton
Docks is also well organized, so that local consignees
are excellently served, whilst the railway connections
to London and the North of England are such that
to quote only one example, it is possible for goods to
be put on rail in the west of Canada or the United
States, shipped across the Atlantic to Southampton,
and be on sale in London inside 10 days. Besides
boxed fruit and flour, which are shown in our illus-
trations being unloaded from the Canadian Pacific
liner "Empress of France," bacon is another commo-
dity which is now playing an important part in the
rapidly growing import trade of the port.

Apart from the importation of frozen meat, what is
perhaps one of the most extensive and important
branches of the trade of Southampton, England, is
the import of flour and fruit from Canada and the
United States. These commodities have for a good
many years been arriving at the Hampshire port in
steadily increasing volume, and as they are usually
carried in large passenger vessels, to ensure prompt
and regular delivery, the recent rapid development of
liner traffic at Southampton has naturally been re-
flected in a corresponding growth in the imports of
North American flour and fruit. So many of the big
trans-Atlantic steamers have been diverted from other
British ports that this movement was almost inevit-
able, and during the last few years developments in
this connection have been very rapid. In consequence
it is greatly to the credit of the Southern Railway
Company that they have succeeded in so organizing
their facilities in the docks that they have been able

Protect the prospective mother.
